

Got Birds?..... We Can Help You!

Every year nuisance birds cause millions of dollar's worth of damage to agricultural crops, private and public properties and can cause serious health related problems through their waste that can affect humans, domestic animals and other wildlife. Let the experts at *American Hawkeye* help alleviate your pest bird problem.

*American Hawkeye* uses trained raptors to chase away nuisance birds. All prey animals have an innate fear of aerial predators; sometimes just the presence of a live raptor is enough to scare away the pests. Falconry based bird abatement is a very effective way to eliminate your bird problem. Not only is it more effective at removing birds compared to other methods such as air cannons, strobe lights, scare crows, shotguns and poison, it's ecofriendly and causes no other impact to the environment or infrastructures. The goal is not to kill the nuisance birds, but to scare or chase them off the premises, in most cases permanently!

If you think you could use our services, or wish to learn more about our company, please feel free to contact us any time! We have all of the state and federal licenses required for falconry based bird abatement. We offer free consultation, estimate and when possible a free demonstration.

*Our services are ideal for parks, golf courses, sports fields, resorts, vineyards, orchards and other agricultural operations. We can also eliminate pests birds from buildings and urban habitats.*

We target several different species of nuisance birds including but not limited to:

- Canada Geese
- Pigeon or Rock Dove
- European Starling
- American Crow
- Different species of gulls
